CAREER OBJECTIVE

A highly motivated and skilled Front End Developer with 4 years of experience in designing, developing, and maintaining web applications. Committed to delivering high-quality code, optimizing performance, and creating efficient and scalable solutions. Seeking an opportunity to contribute my expertise to a dynamic team and make a meaningful impact on challenging projects.

TECHNICAL SKILLS

- Experience with front-end technologies such as HTML, CSS, JavaScript, jQuery.
- Familiarity with version control systems like Git for collaborative development.
- Ability to create RESTful APIs and integrate third-party APIs into applications.
- Knowledge of front-end frameworks. Vue.js and React
- Understanding of software development best practices, including code testing, code reviews, and documentation.
- Strong problem-solving skills and the ability to troubleshoot and resolve complex issues.
- Excellent communication skills and a team-oriented approach to work.
- Proficient in PHP, Laravel framework, and related technologies.
- Strong understanding of object-oriented programming (OOP) principles and design patterns.
- Solid knowledge of database systems, particularly MySQL and relational database design.

EXPERIENCE

1) **Organization/Institution:** Quanteq Technology Services, Abuja.

Responsibilities/duties: Junior web developer/intern.

- Effectively wrote clean, reusable codes on different projects for Quanteq Technologies.
- Updated web content (including images, links and texts during my 6-month undergraduate internship at Quanteq Technologies.

- Understood the marketing objectives for each projects assigned and ensured deadlines for assigned projects were met.
 - Fully involved in training classes on Web development conducted for clients.
- 2) **Organization/Institution:** ECWA Theological College, Kano state.
Responsibilities/duties: served as a Corp member and was in charge of the general use of computer equipment in the school.
- 3) **Organization/Institution:** Envio Logistics, Gwarinpa Abuja.
Responsibilities/duties: Full stack website developer.
- Maintain websites including content updates, feature enhancements, documentations, and regular upgrades.
 - Ensured cross-browser compatibility and optimized website performance for a seamless user experience.
 - Research new web technologies, including software and hardware development and recommend purchase and changes in design, security, software and hardware.
 - Collaborated with a team of developers to design and implement new features for a large-scale Laravel-based web application.
 - Improved application performance by optimizing database queries and implementing caching mechanisms.
 - Integrated various third-party APIs to enhance functionality and improve user experience.
 - Conducted code reviews and provided constructive feedback to team members to maintain code quality.
 - Worked closely with the product team to gather requirements and implement new features.
 - Troubleshoot and resolved bugs and issues reported by users in a timely manner.
 - Assisted in the deployment process and monitored application performance in production environments.
